1. Introduction

The MA912 Guardian is a new generation of combination antenna. It is the first panel antenna worldwide designed for IoT gateway and router devices. It is a low profile 2 in 1 wall and adhesive mount antenna. It is a heavy-duty, fully IP67 waterproof resistant external M2M antenna for use by RF professionals in:

- IoT Gateway and Routers
- HD Video Streaming
- Transportation
- Remote monitoring applications

This antenna delivers powerful MIMO antenna technology for worldwide 4G LTE bands at 698-4000MHz bands and dual 2.4/5.8GHz Wi-Fi. It enables designers to cover a wide range of technologies by installing a single antenna.

4G wireless applications demand high speed data uplink and downlink. High efficiency and high gain MIMO antennas are necessary to achieve the required signal to noise ratio and throughput required to solve these challenges. Taoglas also takes care to have high isolation among these antennas to prevent self-interference. Low loss cables used to keep efficiency high over long cable lengths.

The housing is made of durable ASA, is IP67 waterproof and comes with a 3M foam adhesive. The antenna can be mounted internally or externally on a vehicle or building. The MA912 comes with 3 meters TGC-200 cable as standard. Customized cables and connector versions are also available. Contact your regional Taoglas customer support for more information on how to integrate the MA912 or sales support.
